

## Nell Estes

I have been blessed to serve as an administrator for Legacy since 2000 when Legacy began as Bristol Academy. I also work as the administrator for The Science Academy Mobile Lab, which partners with Legacy to provide creation and lab science "on the road." Previously, I was a church administrator for 14 years as my husband, Joe, and I were church planters. I am excited to be a part of the unique Christian education opportunity at Legacy and to share in the special community of families through the years.
