

Pests and non-chemical management practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Chemical pest management practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

This school district expects the following pesticides (pesticide products and active ingredients) to be applied during the year. (This list includes pesticides that will be applied by school district staff or licensed pest control businesses.):

See attached list from Deik Pest Control

Healthy Schools Act

This school district complies with the notification, posting, recordkeeping, and all other requirements of the Healthy Schools Act. (Education Code Sections 17608 – 17613, 48980.3; Food & Agricultural Code Sections 13180 – 13188)

Training

Every year school district employees who make pesticide applications receive the following training prior to pesticide use:

- Pesticide specific safety training (Title 3 California Code of Regulations 6724)
- School IPM training course approved by the Department of Pesticide Regulation (Education Code Section 16714; Food & Agricultural Code Section 13186.5).

(the school does not apply pesticides, only Deik pest control does)

Submittal of pesticide use reports

Reports of all pesticides applied by school district staff during the calendar year, except pesticides exempt¹ from HSA recordkeeping, are submitted to the Department of Pesticide Regulation at least annually, by January 30 of the following year, using the form provided at www.cdpr.ca.gov/schoolipm. (Education Code Section 16711)

(Deik Pest Control submits records annually)

Notification

This school district has made this IPM plan publicly available by the following methods (check at least one):

- This IPM plan can be found online at the following web address: fbcschools.com
- This IPM plan is sent out to all parents, guardians and staff annually.

Review

This IPM plan will be reviewed (and revised, if needed) at least annually to ensure that the information provided is still true and correct.

Date of next review: January 2016

I acknowledge that I have reviewed this school district's IPM Plan and it is true and correct.

Signature: *[Signature]* Date: 1-29-15

¹ These pesticides are exempt from all Healthy Schools Act requirements, except the training requirement: 1) products used in self-contained baits or traps, 2) gels or pastes used as crack and crevice treatments, 3) antimicrobials, and 4) pesticides exempt from U.S. EPA registration. (Education Code Section 17610.5)

DELK PEST CONTROL - PESTICIDE DISCLOSURE NOTICE

CHEMICAL ODOR - Most of our chemicals have little to no odor. If there is an odor it will dissipate within a few days. The pesticide codes are included below.

STATE LAW REQUIRES THAT YOU BE GIVEN THE FOLLOWING INFORMATION: "CAUTION - PESTICIDES ARE TOXIC CHEMICALS" "Structural Pest Control Operators are registered and regulated by the Structural Pest Control Board, and apply pesticides which are registered and approved for use by the California Department of Pesticide Regulations and the United States Environmental agency. Registration is granted when the State finds that based on existing scientific evidence there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized."

If ingested or "If within 24 hours following a pesticide application you experience symptoms similar to the common seasonal illness comparable to the flu, contact your physician or **POISON CONTROL** 800 876-4766 800-342-9293 or **Med Net** 1-800-501-9008 AND **DELK PEST CONTROL** 209-465-5656 OR 559 275-2206 immediately."

FREQUENCY OF SERVICE MONTHLY BI-MONTHLY QUARTERLY

PROP 65 Delk Pest Control does not regularly use products on the Prop 65 list. However, a certain situation may require the use of a pesticide on the list. Should we use one of the products on the Prop 65 list we will notify you by completing this section.

The pesticide, _____, we used today is on the Prop 65 List and is

- A Carcinogen - "Warning: this product contains chemicals know to the State of California to cause cancer"
- A Teratogen - "Warning: this product contains chemicals known to the state of California to cause birth defects or other reproductive harm"
- A Carcinogen and Teratogen - "Warning this product contains chemicals known by the State of California to cause cancer and birth defects or other reproductive harm"

Please Post

At Delk we understand the potential odor and exposure problems that our commercial accounts can encounter. Thus, caution guidelines are set to alleviate a large percentage of these potential problems. Critical to achieving effective pest control in commercial accounts is the cooperation between the customer and the technician, and an effective sanitation program.

The following caution guidelines are set to alleviate the possibility of pesticide exposure:

- Limit inside treatments to bait, crack and crevice, or spot bait treatments.
- Any extensive treatments will be done after the close of business.
- Use only low odor pesticides.
- Service the account when the least number of people (employees/customers) are present.
- Use only licensed service technicians.
- Supply labels and/or MSDS upon request.
- Use pesticides in accordance to label directions and local, state and federal regulations.
- Use IPM to reduce pesticide use on the premises.
- Use Sanitation reports.
- Do quarterly quality control checks.
- Meet state, local and federal posting and notification requirements.
- Always practice Integrated Pest Management.
- Safety, inspection, monitoring, documentation and communication are a must.
- In food handling accounts meet or exceed A.I.B. and USDA standards.
- Follow guidelines set forth in AB 2260 on all public school accounts.

What is Green?

"Green" is used in advertising and news reports promoting environmental friendly products or services. It is also the "new way" of doing business; taking responsibility for how each one's business and life style affects our delicate ecosystem.

Delk Pest Control strongly believes in protecting our environment. Integrated Pest Management (IPM) is the most important tool to help protect our environment. This works by correcting conditions that increase pest problems like good sanitation practices, removing debris in yard, landscape maintenance and sealing cracks & crevices.

By doing these simple steps, the amount of pesticide and less toxic materials used is decreased. Care is always taken when applying pesticides to prevent the product from moving and ending up in streams and waterways. You can also use botanical products like mint oil, rosemary oil, clove oil and pyrethrum based pesticides when spraying.

If you have questions, or need help in eliminating unwanted pests, please contact the professionals at Delk Pest Control.
