## WE WELCOME YOU!

There are many good reasons for coming to church, but we hope that your joining us this morning includes the best reason: to thank and worship God for His amazing love revealed in the birth, life, and ministry, the suffering and death, and the wondrous resurrection of our Lord Jesus Christ! This is what our church is all about! If you are visiting today, please fill out a guest card and bring it to our Welcome Center in the foyer and receive a free gift. Thank you ... and visit us again!

---

The mission of our church is to prayerfully  
prepare believers for worshiping God, serving  
Christ, loving one another, and  
reaching out to others!

---

### **This Week in Church History...**

On February 5, 1837, Dwight L. Moody, American evangelist, was born at Northfield, Massachusetts. At age 18, he gave his life to Jesus Christ through the testimony of his Sunday School teacher, Edward Kimball. Five years later, he left his job in his uncle's shoe repair shop to devote his life to Christian evangelism and education. On February 5, 1887, he founded the Chicago Evangelization Society, along with English-born educator Emma Dryer. This educational organization eventually grew to become Moody Bible Institute.

### *THOUGHT FOR THE WEEK...*

# **“Sharing the Gospel: The Salvation Verses!” (Part 4) Acts 4:1-13**

On December 27, we looked at spreading the Gospel - the good news! - concerning Jesus Christ. We are told by our Lord to do this, and our sharing the Gospel is the only way that people are going to trust in Jesus! There are people all around us who are on their way to Hell because they have not yet put their faith in Jesus Christ, Who died for them and rose from the dead. We need to ask God for “Divine appointments” to share the Gospel, and then share it! There is an inherent blessing in doing so! We are looking together at some of the verses we all can and should use when we share the Gospel. We have already looked at John 3:16, Ephesians 2:8&9, Romans 3:23, and Romans 6:23.

Today: Acts 4:12: “And there is salvation in no one else; for there is no other name under Heaven that has been given among men by which we must be saved.”

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons why the public sector has expanded so rapidly. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need care. In addition, the incidence of chronic diseases such as heart disease, cancer and diabetes is increasing, and this is also leading to an increase in the demand for health care services.

Another reason why the public sector has expanded so rapidly is the increasing demand for health care services from the private sector. The private sector is becoming increasingly competitive, and this is leading to an increase in the demand for health care services. In addition, the private sector is becoming increasingly integrated with the public sector, and this is also leading to an increase in the demand for health care services.

There are a number of challenges that the public sector faces in meeting the increasing demand for health care services. One of the main challenges is the increasing cost of health care services. The cost of health care services is increasing rapidly, and this is putting a strain on the public sector's budget. In addition, the public sector is facing a shortage of health care workers, and this is also putting a strain on the public sector's budget.

There are a number of ways in which the public sector can meet the increasing demand for health care services. One way is to increase the number of health care workers. This can be done by increasing the number of people who are trained to become health care workers. In addition, the public sector can increase the number of health care services that it provides. This can be done by increasing the number of health care facilities and by increasing the number of health care services that are provided at each facility.

Another way in which the public sector can meet the increasing demand for health care services is to increase the efficiency of health care services. This can be done by increasing the use of technology and by increasing the use of evidence-based practice. In addition, the public sector can increase the efficiency of health care services by increasing the number of health care workers who are trained in evidence-based practice.
