LATER TODAY...

6:00 PM

Youth Group (grades 6-12)

6:00 PM

[No Prayer Time tonight]

6:00 PM

Edge Group (age 18-25)

WE WELCOME YOU!

There are many good reasons for coming to church, but we hope that your joining us this morning includes the best reason: to thank and worship God for His amazing love revealed in the birth, life, and ministry, the suffering and death, and the wondrous resurrection of our Lord Jesus Christ! This is what our church is all about! If you are visiting today, please fill out a guest card and bring it to our Welcome Center in the foyer and receive a free gift. Thank you ... and visit us again!

The mission of our church is to prayerfully
prepare believers for worshiping God, serving
Christ, loving one another, and
reaching out to others!

2017 YEAR VERSE:

"You shall love the LORD your God with all your heart
and with all Your soul and with all your might."

~ Deuteronomy 6:5

ARE YOU REGISTERED FOR CAMP YET? There are still three weeks to choose from at Broken Arrow Bible Ranch! "Junior Camp", (ages 8-12) week is this week; "Teen Camp", (ages 13-19) weeks are July 24 and July 31. Bright orange information/registration forms are at the Welcome Desk. Why not go to camp this Summer? You'll be glad you did!

Summer is the perfect time to give someone a gospel tract! Tracts are available for you at the Welcome Desk in the foyer.

A LIST of July birthdays and anniversaries of GBC regular- attenders is on the kitchen door. Please make (legible) additions/corrections right on the list. Thank you!

GLENN & SHIRLEY MARSHALL'S NEW ADDRESS (ETC.)

Glenn and Shirley Marshall
6707 Newman Rd.
Waxhaw, NC 28173-8448

Glenn's cell (505-290-1425
Glenn's email: gmarshall@uim.or gemarsh@pinonmesa.net

SUNDAY, JULY 30, NOON
~ Quarterly Business Meeting ~
Join us!

This Week in Church History...

On July 17, A.D. 431, the Council of Ephesus adjourned. The third of the 21 ecumenical councils of the church, the council condemned Nestorianism (which denied the real unity of the divine and human natures in the Person of Christ), defined Mary's title as "*Theotokos*" ("*Bearer of God*"), and condemned Pelagianism (the belief that human nature could take the initial steps toward salvation by self-effort, unaided by divine grace).

THOUGHT FOR THE WEEK...

"Holiness is the best sabbath dress - but it is equally suitable for everyday wear."

~ C. H. Spurgeon

PRAISE & PETITION

“Blessed is the Lord, Who daily bears our
burden, the God Who is our Salvation.”

~ Psalm 68:19

Praise the Lord for:

1. Our nation and all the freedoms we enjoy!
2. The wonderful gift of salvation that is ours as we put our faith in Jesus Christ, Who died in our place for our sin.
3. The summer season, with all of its opportunities for traveling and witnessing.
4. A great fifth week of camp at Broken Arrow Bible Ranch - over 120 campers and many decisions for Jesus!
5. Jesus' soon return. Perhaps today!

Petition the Lord for:

1. More of a heart for the lost! More desire to share the gospel!
2. All our moms, dads, families, as they strive to take a stand for Jesus Christ.
3. The staff at Broken Arrow Bible Ranch, as they prepare to begin week #6 of the camping season tomorrow afternoon.
4. The True Hoops Basketball Camp (Adrian Pete) going on at Rehoboth.
5. Caitie Yale, ministering in Uganda; Jose Silva, ministering in the U.S.; Jared Sowers, ministering in South Korea.
6. Glenn & Shirley Marshall as they settle in to their new home in North Carolina.
7. Sean Begaye, in Afghanistan; Adam Sowers (S. Korea); Kyle Prendergast (Ophelia Krupica's son), stationed (Air Force) in Germany; Jesus, Jessalyn, Nora, and Ayla Ubanda (Okinawa, Japan); Whitney Pratt (Air Force); Jared Payton (Tucson, AZ)
8. Our President, Vice-President and staff, military advisors, military men and women.
9. Those who need the Lord's healing touch:
 - Jeremy Richardson (brain tumor)
 - Eliza Jonkman (Schells' granddaughter)
 - Linda Luginbuhl (cancer)
 - Shirley Marshall (Good Samaritan, Grants)
 - Doris Smallcanyon (recovering from surgery)
 - Nellie Lee (shoulder surgery)
 - Clarissa Darnell (weakening heart)

“The Never-Changing Word of God!”
(Part 12 of a Series in Psalm 119, “Magnifying God’s Word!”)
Psalm 119:89-96

This section of Psalm 119 (“Lamedh” [pronounced, “lahm-ed”]; 12th letter of the Hebrew alphabet; has “L” sound) deals with the unchanging nature, the permanence, of God’s Word. Thus, it also deals with the unchanging nature, the permanence, of God! Let’s see why all of this is so important!

The Word of God: Its ...

1. Permanence (vss. 89-91)

2. Protection (vss. 92, 95)

3. Power (vss. 93-94)

4. Perfection (vs. 96)

This Week at Grace Bible...

(Here at the church unless otherwise noted.)

Monday, July 17

7:00 PM

[No Life Group; resumes 7/31]

7:00 PM

"Impact Group" (20's and 30's Young Professionals) Bible Study at Chris & Sarah Piano's home, 506 Zecca Drive

All-Church Labor Day Picnic @ BABR

September 6

AWANA Begins for 2017-2018 School Year

September 10

"Praise & Celebration" Worship Service

the 1990s, the number of people with diabetes has increased in all industrialized countries.

Diabetes is a chronic disease, and the long-term consequences of diabetes are determined by the degree of glycaemic control. The most important long-term complications of diabetes are cardiovascular disease, nephropathy, retinopathy, and neuropathy.

The aim of this review is to discuss the role of insulin in the treatment of diabetes. The review is divided into two parts. The first part discusses the role of insulin in the treatment of type 1 diabetes, and the second part discusses the role of insulin in the treatment of type 2 diabetes.

1. Type 1 diabetes

Type 1 diabetes is a chronic disease characterized by an absolute deficiency of insulin. The disease is caused by an autoimmune process that destroys the β -cells of the pancreas. The disease is most common in children and young adults.

The main symptoms of type 1 diabetes are polyuria, polydipsia, and weight loss. The disease is usually diagnosed in children and young adults.

The treatment of type 1 diabetes is insulin therapy. The aim of insulin therapy is to maintain glycaemic control and to prevent the long-term complications of diabetes.

There are two main types of insulin therapy: basal-bolus therapy and continuous subcutaneous insulin infusion (CSII).

Basal-bolus therapy consists of a long-acting insulin (basal insulin) and a short-acting insulin (bolus insulin). The basal insulin provides a constant level of insulin, and the bolus insulin provides the additional insulin needed for meals and exercise.

CSII is a form of insulin therapy in which insulin is delivered continuously through a pump. The pump delivers a constant level of insulin (basal insulin) and provides additional insulin (bolus insulin) for meals and exercise.

The choice between basal-bolus therapy and CSII depends on the patient's needs and preferences. CSII may be preferred in patients who have difficulty with basal-bolus therapy or who have a high degree of glycaemic variability.

The goal of insulin therapy in type 1 diabetes is to maintain glycaemic control and to prevent the long-term complications of diabetes. The target glycaemic control is a HbA_{1c} of less than 7.0%.

The most important long-term complications of type 1 diabetes are cardiovascular disease, nephropathy, retinopathy, and neuropathy. The risk of these complications is increased in patients with poor glycaemic control.

The role of insulin in the treatment of type 1 diabetes is to provide the insulin that is missing in the body. The aim of insulin therapy is to maintain glycaemic control and to prevent the long-term complications of diabetes.

2. Type 2 diabetes

Type 2 diabetes is a chronic disease characterized by insulin resistance and a relative deficiency of insulin. The disease is caused by a combination of genetic and environmental factors.

The main symptoms of type 2 diabetes are polyuria, polydipsia, and weight gain. The disease is usually diagnosed in middle-aged and older adults.

The treatment of type 2 diabetes is insulin therapy. The aim of insulin therapy is to maintain glycaemic control and to prevent the long-term complications of diabetes.

There are two main types of insulin therapy: basal-bolus therapy and CSII. The choice between basal-bolus therapy and CSII depends on the patient's needs and preferences.

The goal of insulin therapy in type 2 diabetes is to maintain glycaemic control and to prevent the long-term complications of diabetes. The target glycaemic control is a HbA_{1c} of less than 7.0%.

The most important long-term complications of type 2 diabetes are cardiovascular disease, nephropathy, retinopathy, and neuropathy. The risk of these complications is increased in patients with poor glycaemic control.
