Pursuant to INDEPENDENCE HILL CONSERVANCY DISTRICT's (the "District") inflow removal program for qualifying building sewers with simple clear water connections, Section 5.9 of the District's Code of Bylaws, Rules, and Regulations, *I hereby request and consent* for the District and its authorized agents, contractors, staff, and representatives to come onto my property and modify the building sewer and/or building drain to remove inflow and redirect clear water to an alternative suitable point of discharge directly or indirectly to a storm sewer or to the environment.

1. The District will be responsible for backfilling, compacting, and seeding grass over excavated areas. I will be responsible for death of newly seeded grass due to insufficient or excessive watering, replacement of trees and shrubs, and replacement of concrete or asphalt.

2. The District will charge and I agree to pay to the District, immediately upon demand, 100% of the total cost to the District of the work, including materials and labor, to the extent, if any, in excess of \$ 500.00.

3. The District may delay the start of work for budgetary and other reasons.

4. The District does not assume ownership, responsibility, or liability for maintenance, repair, or replacement of the building sewer or any piping installed to carry clear water to an alternative point of discharge. Subject to any warranty by the District's contractor, I will be responsible for all future maintenance, repair, and replacement.

5. This agreement will be binding on me and all (if any) other co-owners of the real estate, and my and our respective heirs, personal representatives, successors, and assigns.
