A time of discussion, prayer, worship & fellowship

8.28.16

Pastor Jon to Appear on Mountain Views
Channel 18, 20, or 63 (based on your cable provider)

*Summer
Message
Series*

Whether it's blueberries, peaches or strawberries that you fancy, summer is the time of year that some of the sweetest fruits become available. However, it all begins with a seemingly insignificant seed that is placed into the cold darkness of the earth. While spring is warming the soil and people are celebrating Easter, the seed lies in utter seclusion. First, the seed begins to germinate when what will become the basis for the roots and the stem of the plant emerge from the seed. It is important to highlight that the seed begins to grow under the surface where no one can see. Also consider that the seed contains everything it needs to produce the plant, but it must be activated within the soil. Finally, the plant bursts through the soil where it will grow to produce the fruits that we enjoy thus producing many additional seeds with the potential for an endless number of more seeds!

Jesus used the seed in multiple illustrations to demonstrate the great potential that God has given to all people. Everything we need to possess His blessings and live out His plan is already within us. Like the seed, we must allow God's process to activate our potential so that we can live out His purpose. Today, if it seems like nothing is growing or prospering, just know that God often works in unseen and unexpected ways. Don't give up, but let your faith activate your ability to trust God.

"Still other seeds fell on fertile soil, and they produced a crop that was thirty, sixty, and even a hundred times as much as had been planted!"

Matthew 13:8
