Here we are in the first week of October. Summer flew by so fast I just hope winter goes by just as fast. As we are getting closer to winter and colder weather please make sure your babies have appropriate clothing for the season in their cubbies. We try to regulate the temperature of the room as much as possible but it does get cool in there at times.

We are working really hard at keeping the germs at bay by sanitizing the toys weekly by running them through the dishwasher as well as daily they are getting sprayed with bleach water and or Clorox anywhere spray.

I am asking each family to bring in a photo or your baby that we can put on the wall. If you are able to donate this month we could use Kleenex, Clorox, and baby wipes. Thank you in advance for any donations they are very much appreciated.

This month we are working hard toward helping each child to reach their developmental milestones. They are all at different stages being as their first year of life has so many changes and they are learning so many things. Now that I am back full time in the infant room we are concentrating on keeping track of each child’s progress. They have a folder where we are checking off the things they should be able to do and helping them by working on the things they haven’t quite mastered yet. Anytime you wish to see your child’s folder or have any questions or concerns, feel free to speak with me or Debra.
