

**Emmanuel Missionary Baptist Church
Indianapolis, IN**

Omega provided complete design and build services for an addition to this established church on the east side of Indianapolis.

The addition of approximately 44,000 s.f. is a pre-engineered steel building with brick veneer and synthetic stucco accents. The octagonal Sanctuary (including the balcony) seats about 1,000 and includes classrooms, offices and a two-story foyer. The Family Life Center addition includes a full-court gym, bleacher seating, stage, locker rooms, commercial kitchen, offices and classrooms. The design allows the church to expand in phases as it grows. (A 3D computer model was created by Omega to help the church with interior finishes and color selections.)
