

**Mount Helm Missionary Baptist Church
Indianapolis, IN**

Omega was hired to provide complete construction management services for this new church facility and site development on an inner-city corner lot in Indianapolis. The church seats about 400 in pews and 75 on the platform. The construction includes block walls with brick veneer, and laminated wood arches with an exposed wood plank ceiling. The back wall of the platform is stone with a large opening at the baptistry through which the round tinted window lets in diffused light. The atmosphere is warm and comfortable. The floor plan forms a 'T' with the top of the 'T' providing a central hall to offices, classrooms, a fellowship hall and kitchen, nursery, library, restrooms and foyer at the back of the sanctuary.
