

**New Haven Missionary Baptist Church
Indianapolis, IN**

The congregation of this church needed a fellowship hall, offices, kitchen, restrooms, and classrooms as well as more parking. The existing parking area was enlarged, new parking entrances were installed and the site was landscaped. The existing stone veneer was matched and the entire building was re-shingled.

A new entry foyer was added to the existing sanctuary (the wing with the steeple). The foyer runs the length of the sanctuary and connects to the fellowship hall addition.
