

**Willow Run Church of God
Ypsilanti, MI**

Omega has completed the design of a new 1,100 seat sanctuary facility for the Willow Run Church of God. The project involves extensive site development including a new retention pond, additional parking, new entry drive, landscaping and utility work. The 25,000 s.f. new facility is a pre-engineered steel building with a fan-shaped seating plan and a balcony. The exterior is a combination of exterior insulation finish system (synthetic stucco) and brick.

The main floor includes a two-story foyer, office suite, classrooms, sound room, restrooms, bookstore and nursery. A choir prep room is located on the first floor of a two-story tower behind the platform. The second floor includes an elevated baptistry with changing rooms, and a prayer room in the tower. The second floor balcony seating for 463 can be developed as the church grows. The riser seating on each side of the sanctuary provides easy access to the alter area for those seated in the balcony. The sanctuary features special lighting, sound, multi-media and acoustic considerations.
