

## COMPANY PROFILE

Resin Systems, Inc. is an industrial fiberglass fabricator of high-quality, hand-lay FRP pipe, ducts, tanks, and other custom-made specialty items. We, also, fabricate thermoplastic and dual laminate (thermoplastic/FRP) products. We, also, do fiberglass linings, leak repairs, and pipe installations in customer's facilities. We are available for in-plant repairs 24 hours a day, 7 days a week. We manufacture our own FRP pipe, flanges, fittings, and tanks. We have experience with almost every resin used in the industrial market, including epoxy, furan, vinyl ester, and polyester resins. All work is custom made to our customer's specifications.

Resin Systems, Inc. opened for business on April 1, 1983. Since then, we have grown from a 5-employee shop to a 60-employee business. Our production floor space has grown from 3,700 sq. ft. to 61,000 sq. ft. Our pipe and tank producing capabilities range from 1" pipe to 14' tanks. We have an extensive inventory of fitting molds. We have the capability to flange any size pipe we make.

We have traveled out of state to do work many times; however, the bulk of our work is done in Southwest Louisiana. Some of our customers in the Lake Charles area are Axiall (formerly Georgia), Citgo, Phillips66, W.R. Grace, PPG, Tetra, and Sasol. We have successfully completed jobs as small as one fiberglass wrap and as large as 14,000 linear feet of various size and pressure-rating pipe. We plan to compete successfully in the future by keeping the same customer satisfaction priorities of our past.

Resin Systems, Inc. is a locally owned and operated corporation with a Louisiana Contractors License #18163 and Arkansas Contractors License #029795.
