

### **Hand Lay up Fiberglass (FRP)**

High Quality, High Corrosion Resistant, Industrial:

⇒ Piping Systems (full vacuum to 300 psi)

⇒ Ducts (full vacuum to 125 psi)

⇒ Tanks (full vacuum to 15 psi)

Capacity – 1” to 14’ diameter. Single and Dual Wall systems

Custom designed shapes and transition pieces.

Materials of Construction: Vinyl Ester, Poly Ester, Isothalic, Furan, Epoxy, Fire Retardants.

### **Thermoplastics**

High Quality, High Corrosion Resistant, Industrial:

⇒ Piping Systems (full vacuum to 150 psi)

⇒ Ducts (full vacuum to 125 psi)

⇒ Tanks (full vacuum to 15 psi)

Capacity – 1” to 14’ diameter. Single and Dual Wall systems

Custom designed shapes, tubs, and troughs.

Materials of Construction: PVC, CPVC, HDPE, PP, PVDF, FEP, PFA, Kynar.

Dual Laminates – Thermoplastic liner/FRP structural.

ASTM and RTP-1 qualified welders.

### **Field Services**

⇒ Maintenance: 24 hour on-call service, turnarounds, annual maintenance contracts.

⇒ Installation: In-plant installation of piping systems and application of liners to new and existing vessels.

### **Customer Service**

⇒ Estimating and Budgetary assistance

⇒ Drafting, Design, and Engineering Service

### **Client List**

Axiall (formerly Georgia Gulf), Citgo, Oxy, Phillips 66, PPG, Tetra, and W.R. Grace

Resin Systems, Inc. is a proudly locally owned and operated corporation with a Louisiana Contractors License #18163 & Arkansas Contractors License #029795.
