

Summer Learning Program

Dear Parents and Students,

We are thrilled to offer a summer reading and math program that enables students in grades 1st through 6th to earn prizes through goals reached from summer reading and math. Prizes range from field trip opportunities to gift cards; pizza parties at school to toys and prized items.

EARN YOUR LEARNING BUCKS!

Earn a learning buck for every 30-minute increment of time spent reading in a book on our reading list or practicing math on Khan Academy. All reading and Khan hours must be recorded on the Learning Log (see attached)

For the reading list, please see attached list.

Khan Academy Step-by-Step instructions:

1. Go to khanacademy.org and login with your username and password. Create a login-in if you don't have one already.
2. Once you login, it may prompt you to take a pretest. You are welcome to do this, as it can earn you additional points, though it is not necessary.
3. On the top left-hand side of the screen, under the "Subjects" tab, select "Math by Grade" and your appropriate **grade or class** which you have **just completed**. Begin working on the skills it will prompt you to work on.

[Khanacademy.org](https://khanacademy.org) is a self-paced online educational program that can be accessed at home or a library with an internet connection. For elementary students, this is the full set of skills for the grade you have just completed.

Restoration Academy encourages students to live out the greatest commandment, to love the Lord your God with all your heart, soul, mind, and strength, at all times and in all places. We seek to encourage continued intellectual growth over the summer as our ongoing commitment to seeing each student reach his or her full potential. The multifaceted summer learning program enables students not only to best prepare themselves for the upcoming school year, but to develop a lifelong love for learning.
