Saint Joseph School Summer Math Packet 2018

All students entering 6th, 7th, or 8th grades for the upcoming school year must complete the corresponding math packet over the summer. I suggest you do a little bit each week rather than waiting for the last minute to complete the packet. Please show all work for the problems. I highly suggest you purchase a composition book in which to record all your work. Please keep everything neat and in order. All packets are due September 7th. This will be your first grade of the marking period. Your grade for the packet will be the total number of correct answers divided by the total number of questions.

Once my school webpage has been set up you may check there for contact information. I will be more than happy to assist anyone having difficulties with the packets.

Have a safe and enjoyable summer. See you in September!

Mr. Hart
