Brownlow Technical Specification (designed with tech geeks in mind)

Equipped with a full PA system installed including NEXO PS15 speakers and controller, NEXO LS1200 subs, NEXO PS10 side fill speakers and controller, QSC speaker/monitor amps (PLX2502, PLX 3602 and 2 PLX1802,), RDS Studiomaster AX3500 monitor amp. Four Wharfedale pro EVP-15M monitor speakers, 40 channel multicore, Soundcraft live 42 channel mixing Desk, Compressor, feedback destroyer and ultra curve processors. There is also optional surround sound via 2 JBL EON 15's rear speakers.

This is all powered via a 3 phase mains connection behind the stage with floor trunking to the rear of the hall. The stage is approximately 6m deep by 10 wide with a truss across the ceiling above the steps up to the stage.

The standard room lighting is controlled through an iLIGHT digital system including central block down lighters, side lights, side up lighters and 8 PAR56 lighting cans. All of this lighting plus the LEDJ DMX controlled 252RGB LED bar backwash lights at the rear of the stage can also be controlled via a 48 channel, GLP light operator 48, lighting desk.

The room is equipped with two front screens and two Optoma EP871 projectors along with rear screen and Optoma EP728i projector. These can be controlled either through our high end PC running Easyworship2009 (a projection system designed with churches in mind: including images, videos, DVD, live feed and live web projection as well as song words and bible verses), or through your own laptop via a connection at the front or rear of the room. There is also DVD, blu-ray, freesat, video and svideo input/playback capabilities including surround sound option via rear speakers (JBL EON 15's). Should you require we also have a clicker available to aid in your PowerPoint presentations.
