## **A Special Message for Summer Travelers**

Would you find it helpful to have your offerings debited directly from your bank account as you probably do with other obligations? Troy First UMC offers electronic giving for those of you who wish to have contributions transferred electronically to the church's account. If you have plans to travel this summer, electronic giving gives you a convenient way to keep up with your intended offerings. Visit our website at [www.troyfumc.org](http://www.troyfumc.org).

## Bradley's Challenge

Bradley's House of Hope was founded in 2005 as a place to provide physical therapy for children in the Managua, Nicaragua area.

Nicaragua is the second poorest country in the western hemisphere and there is a tremendous need to provide help for the special needs children who live there. Currently, there are over 70 children receiving much needed therapy at Bradley's House.

We are attempting to raise money to expand the equestrian therapy program, and are looking for sponsors. The children who participate in the equestrian therapy program light up like a Christmas tree when around the horses, and the joy they feel is beyond description!

We are attempting to raise funds by doing a weight loss challenge. We currently have 16 people who have committed to losing weight (the individual weight goals vary) and are looking for sponsors. If you would like to sponsor an individual, just pledge a dollar amount and hopefully when the challenge wraps up on September 11,

there will be 16 people a little more healthy and lots of funds raised for Bradley's House. To donate go to:

<https://www.crowdrise.com/bradleys-challenge>.

## Summer Music

Our Chancel Choir and Bell Choir take time off in the summer months. If you would like to provide special music on one or two Sundays, please contact Wayne Gillespey at: [wgillespey@woh.rr.com](mailto:wgillespey@woh.rr.com).

## UMW Mission Moment

Never forget that our God is a God of second and sometimes third chances. When I started my ministry, I was diagnosed with multiple sclerosis (MS), so I helped others with MS. I am now in remission. Then I had breast cancer and got over that. Ten years later it came back. The truth is that through it all you are never alone, and never the only one dealing with illnesses. You never walk alone! No matter what, your life is a testimony, so use it for the glory of God. Charmaine Cothran, deaconess, African Americans Living with Multiple Sclerosis, Chicago, Ill.

Please keep the following member(s) of our church family in your prayers:

**Karen Painter**, Troy Center

**Bud Runner**, UVMC Hospice Care

**Howard Wigdahl**, Randall Residence

**Carlos Wolfe**, home

**Martha Rogers**, Randall Residence

**Barb Warner**, Breast cancer

**George Dearth**, Brookdale

*You may add a church family member to the list after first obtaining their permission and then contacting the church office at 335-2826 or [staff@troyfumc.org](mailto:staff@troyfumc.org).*

# What is ultraviolet (UV) radiation?

Exposure to ultraviolet (UV) radiation is a major risk factor for most skin cancers. Sunlight is the main source of UV rays. Tanning lamps and beds are also sources of UV rays. People who get a lot of UV exposure from these sources are at greater risk for skin cancer.

Even though UV rays make up only a very small portion of the sun's rays, they are the main cause of the sun's damaging effects on the skin. UV rays damage the DNA of skin cells. Skin cancers start when this damage affects the DNA of genes that control skin cell growth.

There are 3 main types of UV rays:

- UVA rays age skin cells and can damage their DNA. These rays are linked to long-term skin damage such as wrinkles, but they are also thought to play a role in some skin cancers. Most tanning beds give off large amounts of UVA, which has been found to increase skin cancer risk.
- UVB rays have slightly more energy than UVA rays. They can damage skin cells' DNA directly, and are the main rays that cause sunburns. They are also thought to cause most skin cancers.
- UVC rays have more energy than the other types of UV rays, but they don't get through our atmosphere and are not in sunlight. They are not normally a cause of skin cancer.

Both UVA and UVB rays can damage skin and cause skin cancer. UVB rays are a more potent cause of at least some skin cancers, but based on what's known today, there are no safe UV rays.

The strength of the UV rays reaching the ground depends on a number of factors, such as:

- Time of day: UV rays are strongest between 10 am and 4 pm.
- Season of the year: UV rays are stronger during spring and summer months. This is less of a factor near the equator.
- Distance from the equator (latitude): UV exposure goes down as you get further from the equator.
- Altitude: More UV rays reach the ground at higher elevations.
- Cloud cover: The effect of clouds can vary. Sometimes cloud cover blocks some UV from the sun and lowers UV exposure, while some types of clouds can reflect UV and can increase UV exposure. What is important to know is that UV rays can get through, even on a cloudy day.
- Reflection off surfaces: UV rays can bounce off surfaces like water, sand, snow, pavement, or grass, leading to an increase in UV exposure.

## **Hope Over Heroin July 8<sup>th</sup> & 9<sup>th</sup>**

Hope Over Heroin is a collaborative ministry led by Pastors in Ohio and Kentucky who came together to connect the Body of Christ in order to Break the chains of the Addicted! In 2014, Our Pastoral Team became heartbroken witnessing the losses from addiction like never experienced before. That realization led to mobilizing prayer warriors and compassion evangelism in the streets, specifically in areas that were most impacted and ravaged from the epidemic of Heroin, Opiates and Drug Related issues. The natural outflow of bringing the Holy Spirit to those that need Him most, began the planning of the first of many Hope Over Heroin events across the country! For more information go to: [www.hopeoverherion.com/troy/oh](http://www.hopeoverherion.com/troy/oh) or [www.hopeoverherion.com/donate/now](http://www.hopeoverherion.com/donate/now).
