

God Reached Me

My husband and I had the pleasure of visiting Windsor Park on Sunday 7th June 2015. I felt I could share my story, but not being members of Windsor Park, preferred to write it down. Thank you for the opportunity: In Nov 2010 I found out that I had breast cancer, and 2 weeks later had surgery - a mastectomy and reconstruction. Afterwards I found myself in a hospital room that was kept uncomfortably hot (on purpose) with pumps on my legs, oxygen, and I V tubes in arms. There I was, stranded and unable to move much, so I listened to worship songs. One night I experienced an amazing touch from God. I was in a "dreamy state" when I felt I was dancing with God!! There was such incredible comfort and peace, and the joy of freedom to move!! Our awesome God reached out to me and picked me up, just as Pastor Troy described He can, and will. So I give all thanks and praise to God for allowing me that experience; for placing wonderful people - family and friends - around me who supported and prayed; and for the care of all the medical professionals. God helped me through a difficult year and I am so grateful now for good health again.
