TIM TALK

The weather outside definitely lets us know that autumn is here. Morning temperatures in the 50s make for some cool commutes via bicycle!

While spring used to be my favorite time of year, fall is fast becoming the most enjoyable season for me. One of the things of which God reminds us at this time of year of the beauty of rest.

We look around at the first few trees beginning to turn and know that one of God's greatest displays of creativity is coming. We watch in awe each year as green gives way to more shades of yellow, red and orange than we thought possible.

The trees are leaving the heavy production of the summer months, preparing for the cold dormancy of winter. But right in the middle of that process comes the big show. Science would tell us that it is the buildup of tannins that are expressed due to the slowdown in photosynthesis and lack of chlorophyll.

Technically speaking, that's true; however, we know the architect who designed all that to coincide with the revolution of the earth around the sun (which He also created).

Perhaps God would remind us that, in the midst of our insanely fast-paced life, a little slowing of the activity can bring some beautiful results (for instance, lower blood pressure, fewer ulcers, more time with family, less yelling at family, etc.).

Maybe it is the gradual slowing and preparation of the fall that allows the trees to survive even brutal winters. You see the parallel? A little slowing, a time of rest may be just what the Great Physician has ordered to prepare us for the cold, foggy days ahead. What a blessing!

Thank you, God, for placing so many teachers in your created world. Until we meet again, TWP

What a wonderful church family we all belong to. Many, many thanks for all the lovely cards and welcome phone calls. Thanks also for your visits, flowers and for those of you who brought food. It was all so great!

Love all of you, Virginia Edwards
