

Online Fundraising

Sign up: This is very easy and primarily requires you to create a username/password.

A **profile page** will be set up for you. We suggest adding a picture and some text about you and your cause. This will help motivate people to give to you.

Then, go to the Walkabout Project page at www.crowdrise.com/19miles.

Once there, click the button that says "**Join the Team.**"

Your own fundraising page will be created within 27 seconds.

Once your page is created, feel free to hit the "**Edit this Page**" link at the top right and edit the text to make it more personal.

Type something in the status box about why you've joined the team. (This is much like posting a status on Facebook.)

Then, **start spreading the word**. Share the link with your friends. (Your fundraising page will have its own URL address.) Post your project on Facebook, etc. Send out personal emails with a link to your page, asking friends to donate to your cause.

A word about voting:

Once you've logged onto your account in Crowdrise, you'll notice you can vote for people by giving them points. Why? It's just a fun way to say "hey, you're doing cool stuff... here's a vote for you." Don't waste too much time on this. The most important part is getting donations!
